Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is responsive to the amendment filed October 24, 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

Applicant's election without traverse of Figs. 1, 2, 26a, 27a in the reply filed on October 24, 2005 is acknowledged.

Claims 6-9, 21-43, 50-53, 55 and 57-59 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 24, 2005. Concerning claims 44-49, 54 and 56, the claims have been withdrawn from consideration since the embodiment of Figures 1 and 2 is inconsistent with and does not include a yoke and/or a pair of side-by-side rollers as depicted in Fig. 26a.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the lever arm" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by DE ('377).

DE discloses a lever system (Fig. 1) for a motor vehicle comprising a lever (15) with portions and points, a radially displaceable fulcrum (12), an energy storage mechanism (16) including a disk spring, a pressure plate (6), a flat/smooth running surface, and concave surface portion.

Claims 1-5 and 14-20 rejected under 35 U.S.C. 102(e) as being anticipated by Cole et al. ('517).

Cole discloses a lever system (Fig. 1) for a motor vehicle comprising a clutch (28), a lever (radially projecting cantilever nest/support corresponding to roller/fulcrum 55), a fulcrum (55) moveable radially through its arcuate motion, a second lever or disk spring (38), first axial bearing (12), and a pair of aligned roller bodies (55 – Fig. 2).
